14. Amendments to page 75 of the Master Prospectus – “Risk Factors – Specific Risks When Investing In A Money Market Fund”

The information in relation to the specific risks when investing in a money market fund is hereby deleted and replaced with the following:

SPECIFIC RISKS WHEN INVESTING IN A MONEY MARKET FUND

Credit or Default risk

This risk refers to the inability of the issuer of the fixed income securities or sukuk held by the Fund to make the coupon or profit or principal payments when due. In the event the issuer defaults in the coupon or profit or principal payments, the value of the Fund will be adversely affected. The Manager will mitigate the Fund’s credit or default risk by performing continuous fundamental credit research and analysis to ascertain the creditworthiness of the issuer.

This risk also refers to the creditworthiness of the financial institutions and their expected ability to make timely payment of interest or profit and/or principal. In the event the financial institutions default in the interest or profit and/or principal payments, the value of the Fund will be adversely affected.

Interest rate risk

Generally, the value of fixed income securities or sukuk will move inversely to interest rate movements. Therefore, the value of fixed income securities or sukuk may fall when interest rates rise and vice versa. Fixed income securities or sukuk of longer duration tend to be more sensitive to interest rate changes. To mitigate interest rate risk, the Manager will manage the duration of the portfolio based on the Manager’s view of the trend of future interest rates.

Additionally, interest rate fluctuations will affect the fixed deposit or Islamic deposit returns of the Fund. Interest rates offered by the financial institutions will fluctuate according to the overnight policy rate determined by Bank Negara Malaysia and this has direct impact on the Fund’s placement in fixed deposit or Islamic deposit. The Fund will benefit from higher interest rate and in the event that the interest rate is low, the Fund’s returns will also be low.

(Note: the interest rate mentioned above will have an impact on the management of the Fund, regardless whether it is a Shariah-compliant Fund or otherwise. It does not in any way suggest that the Shariah-compliant Fund will invest in conventional financial instruments. All the investments and placements carried out for the Shariah-compliant Fund are in accordance with the Shariah requirements).

THIS FIRST SUPPLEMENTARY MASTER PROSPECTUS DATED 24 NOVEMBER 2016 IS TO BE READ IN CONJUNCTION WITH THE MASTER PROSPECTUS DATED 15 JULY 2016 AND IS VALID UNTIL 14 JULY 2017.
