LIPPER LEADERS RATING (OVERALL)

Total Return	Consistent Return	Preservation	Lipper Leaders Key
④	⑤	③	Lowest ① Highest ⑤

The Lipper Leaders Ratings System is a set of tools that guide investors and their advisors to select funds that suit individual investment styles and goals. It uses investors-centred criteria to deliver a simple, clear description of a fund's success in meeting certain goals, such as preserving capital or building wealth through consistent strong returns.

Lipper Leader ratings are derived from highly sophisticated formulas that analyse funds against clearly defined criteria. Each fund is ranked against its peers based on the metric used (such as Total Return or Expense), and then the top 20% of funds in that ranking receive the Lipper Leader designation. Lipper Leaders measures are not predictive of future performance, but they do provide context and perspective for making knowledgeable fund investment decisions.

FUND MANAGER'S COMMENTARY

January was dominated by political headlines, as the inauguration of President Trump in the US was followed by a flood of executive orders with wide-ranging implications. Investors' focus on the so-called 'reflation trade', which helped to drive the US dollar and global bond yields higher after the surprise Trump election win in November, faded in January. Meanwhile, the gold price rebounded by more than 5%, helped by a weaker US dollar and demand for a safe haven.

Against this background, the fund rose and was ahead of the FTSE Global Basics Composite Index in sterling and euro terms. However, the dollar share class lagged the composite index.
