LIPPER LEADERS RATING (OVERALL)

Total Return	Consistent Return	Preservation	Lipper Leaders Key
5	5	5	Lowest ① Highest ⑤

The Lipper Leaders Ratings System is a set of tools that guide investors and their advisors to select funds that suit individual investment styles and goals. It uses investors-centred criteria to deliver a simple, clear description of a fund's success in meeting certain goals, such as preserving capital or building wealth through consistent strong returns.

Lipper Leader ratings are derived from highly sophisticated formulas that analyse funds against clearly defined criteria. Each fund is ranked against its peers based on the metric used (such as Total Return or Expense), and then the top 20% of funds in that ranking receive the Lipper Leader designation. Lipper Leaders measures are not predictive of future performance, but they do provide context and perspective for making knowledgeable fund investment decisions.

FUND MANAGER'S COMMENTARY

Global markets rallied in the month of February as the positive sentiment from January carried forward. US corporates reporting 4Q 2016 results in February generally surprised the market with a higher percentage of companies beating consensus earnings expectations for their 4Q results, in particular the Technology related companies and Health care. China's central bank raised overnight interest rates for its standing lending facility ("SLF") loans to 3.1% from 2.75%, post the one-week Lunar New Year holiday break, which saw the Chinese Yuan ("CNY") firmer against the US Dollar.

Malaysian equities also had a positive month in tandem with regional markets. Corporate results reporting season for the 4Q 2016 came in mostly inline or slightly above expectations, as compared to previous quarters. The upside surprise came from gaming, plantation, aviation and selected consumer related stocks, some disappointments from the banking and telco stocks. The Kuala Lumpur Composite Index ("KLCI") ended the month higher at 1.33% mom to close at 1,693.77 points. The broader market gained 1.78% outperforming the KLCI. All sectors registered positive performances during the month, with the best performing sector being Technology (+6.9%), benefiting from the strong US dollar sales, and Property (+4.76%). The worst performing sector was Industrial (+0.9%) and Consumer (+1.41%). The FTSE Bursa Malaysia Index ("FBM") Small Cap Index gained 2.18%. Average value traded on Bursa in February was up 18.2% mom to RM2.280bn despite being a shorter trading month.

IMPORTANT INFORMATION

Based on the Fund's portfolio returns as at 31 January 2017, the Volatility Factor (VF) for this Fund is 7.1 and is classified as "Moderate" (Source: Lipper). "Moderate" generally includes funds with VF that are higher than 5.965 but not more than 8.015. The VF means that there is a possibility for the Fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six (6) months. The VF for the Fund may be higher or lower than the VC, depending on the market conditions. The Fund's portfolio may have changed since this date and there is no guarantee that the Fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC.

Investors are advised to read and understand the contents of the Eastspring Investments Master Prospectus dated 15 July 2016 and the Eastspring Investments First Supplementary Master Prospectus dated 24 November 2016 (collectively, the "Prospectuses"), as well as the Fund's Product Highlights Sheets ("PHS") before investing. The Prospectuses and PHS are available at offices of Eastspring Investments Berhad or its authorised distributors and investors have the right to request for a copy of the Prospectuses and PHS.

The Prospectuses have been registered with the Securities Commission Malaysia who takes no responsibility for its contents. Units will only be issued upon receipt of the application form accompanying the Prospectuses. Past performance of the Fund is not an indication of the Fund's future performance. Unit prices and distribution payable, if any, may go down as well as up. Where a unit split/distribution is declared, investors are advised that following the issue of additional units/distribution, the Net Asset Value ("NAV") per unit will be reduced from pre-unit split NAV/cum-distribution NAV to post-unit split NAV/ex-distribution NAV. Where a unit split is declared, investors are advised that the value of their investment in Malaysian Ringgit will remain unchanged after the issue of the additional units. Investments in the Fund are exposed to security risk. Investors are advised to consider these risks and other general risks as elaborated in the Prospectuses as well as fees, charges and expenses involved before investing.

All fees, charges and expenses payable by the unit holder are subject to Goods and Services Tax ("GST") at a rate of 6% or such other prescribed rate as may be imposed from time to time, and incurred by the unit holder directly when purchasing or redeeming units of the Fund and indirectly when investing in the Fund. The fees, charges and expenses disclosed are exclusive of GST or any other taxes or duties that may be imposed by the government or other authorities from time to time.
