LIPPER LEADERS RATING (OVERALL)

Total Return	Consistent Return	Preservation	Lipper Leaders Key
5	5	4	Lowest (1) Highest (5)

The Lipper Leaders Ratings System is a set of tools that guide investors and their advisors to select funds that suit individual investment styles and goals. It uses investors-centred criteria to deliver a simple, clear description of a fund's success in meeting certain goals, such as preserving capital or building wealth through consistent strong returns.

Lipper Leader ratings are derived from highly sophisticated formulas that analyse funds against clearly defined criteria. Each fund is ranked against its peers based on the metric used (such as Total Return or Expense), and then the top 20% of funds in that ranking receive the Lipper Leader designation. Lipper Leaders measures are not predictive of future performance, but they do provide context and perspective for making knowledgeable fund investment decisions.

FUND MANAGER'S COMMENTARY

The US Federal Reserve ("Fed") raised its key interest rates by 25bps to between 0.75%-1.00% during the recent Federal Open Market Committee ("FOMC") meeting on 14-15 March. This is the second time that the Fed has raised its benchmark interest rate in past four months. The Fed policymakers continue to maintain its forecast for another two rate hikes this year according to the "dot plot" of rate projections.

On the domestic front, Bank Negara Malaysia ("BNM") expects headline inflation to trend higher in 2017 on the back of higher fuel prices but believes that the relatively high headline inflation to moderate in the second half of 2017.

Given the current domestic economic environment, we believe that BNM would leave the Overnight Policy Rate ("OPR") rate unchanged in the near term, and that any change to the Overnight Policy rate would depend on BNM's future expectation of domestic growth and inflation.

There will be three government bond auctions in April and there will not be any Malaysian Government Securities ("MGS")/GII maturity in April. As such, Malaysia's sovereign bond market is expected to be well supported from onshore real money investors.

MYR corporate bond market is expected to see continuous decent supply in the pipeline in the coming months. Potential issuers are expected to tap the market as yields have remained relatively stable. However, we believe corporates will remain cautious towards expansion or capex spending in 2017 given uncertainties surrounding global economic outlooks and increasing expectations of hawkish monetary policy from major central banks.

IMPORTANT INFORMATION

Based on the Fund's portfolio returns as at 28 February 2017, the Volatility Factor (VF) for this Fund is 4.1 and is classified as "Low" (Source: Lipper). "Low" generally includes funds with VF that are higher than 1.785 but not more than 5.965. The VF means that there is a possibility for the Fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six (6) months. The VF for the Fund may be higher or lower than the VC, depending on the market conditions. The Fund's portfolio may have changed since this date and there is no guarantee that the Fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC.

Investors are advised to read and understand the contents of the Eastspring Investments Master Prospectus dated 15 July 2016, the Eastspring Investments First Supplementary Master Prospectus dated 24 November 2016 and the Eastspring Investments Second Supplementary Master Prospectus dated 15 March 2017 (collectively, the "Prospectuses"), as well as the Fund's Product Highlights Sheets ("PHS") before investing. The Prospectuses and PHS are available at offices of Eastspring Investments Berhad or its authorised distributors and investors have the right to request for a copy of the Prospectuses and PHS.

The Prospectuses have been registered with the Securities Commission Malaysia who takes no responsibility for its contents. Units will only be issued upon receipt of the application form accompanying the Prospectuses. Past performance of the Fund is not an indication of the Fund's future performance. Unit prices and distribution payable, if any, may go down as well as up. Where a unit split/distribution is declared, investors are advised that following the issue of additional units/distribution, the Net Asset Value ("NAV") per unit will be reduced from pre-unit split NAV/cum-distribution NAV to post-unit split NAV/ex-distribution NAV.

Where a unit split is declared, investors are advised that the value of their investment in Malaysian Ringgit will remain unchanged after the issue of the additional units. Investments in the Fund are exposed to credit or default risk and interest rate risk. Investors are advised to consider these risks and other general risks as elaborated in the Prospectuses as well as fees, charges and expenses involved before investing.

All fees, charges and expenses payable by the unit holder are subject to Goods and Services Tax ("GST") at a rate of 6% or such other prescribed rate as may be imposed from time to time, and incurred by the unit holder directly when purchasing or redeeming units of the Fund and indirectly when investing in the Fund. The fees, charges and expenses disclosed are exclusive of GST or any other taxes or duties that may be imposed by the government or other authorities from time to time.
