FUND MANAGER'S COMMENTARY

The Asian USD bond market (represented by the John Pierpont ("JP") Morgan Asia Credit Index) posted a gain of 0.55% in July. This positive return was driven by a combination of modest spread tightening and lower United States Treasury ("UST") yields.

UST yields started July on a weak note as controversy surrounding US President Trump's links to Russia compounded concerns over his administration's lack of progress on the promised reforms. Weaker-than-expected retail sales and inflation data also contributed to UST yield weakness. However, UST yields inched higher in the last week of July on the back of economic data pointing to sustained growth momentum in the US. The Federal Reserve's signal that it could start to normalise its balance sheet "relatively soon" in its statement also contributed to the upward movement in yields. Consequently, UST yields ended the month marginally lower, with the 2-year yield and the 10-year yield closing the month at 1.35% and 2.29% respectively.

Sovereign bonds outperformed over the month, led by Sri Lanka and Mongolia in the high yield sovereign bond space, and Indonesia in the investment grade sovereign bond space. Sentiment towards Sri Lankan bonds was lifted by news that the International Monetary Fund ("IMF") had approved a new disbursement to the country from its economic reform program. Demand for Indonesian sovereign bonds continue to be strong post its sovereign rating upgrade in May.

High yield corporate bonds outperformed investment grade corporate bonds in July in spite of the idiosyncratic news that affected some high yield issuers. Increased regulatory scrutiny on some Chinese issuers that have expanded aggressively overseas dragged on sentiment. On the other hand, commodity-related names drove outperformance in the high yield corporate sector.

Asian USD bonds have had a decent showing over the year-to-date period. Yield-seeking behavior was strong in Asia as investors generally brushed off macroeconomic and geopolitical concerns globally. Treasury return was also supported by declines in longer term UST yields on the back of soft inflation numbers.

Investor demand for yield helped to prop up the performance of high yield sovereign bonds which outperformed over the year. This was followed by investment grade sovereign bonds, which was driven higher by Indonesia following its sovereign rating upgrade by S&P. High yield corporate bond and investment grade corporate bonds performed largely in line with each other over the year-to-date period.

IMPORTANT INFORMATION

This is a close-ended fund. Units are no longer available for sale on the basis of the Eastspring Investments Target Income Fund 6 ("Fund") Prospectus dated 28 March 2017 ("Prospectus"). Investors are advised to read and understand the contents of the Prospectus and the Fund's Product Highlights Sheet ("PHS") before investing. The Prospectus and PHS are available at offices of Eastspring Investments Berhad or its authorised distributors and investors have the right to request for a copy of the Prospectus and PHS.

The Prospectus has been registered with the Securities Commission Malaysia who takes no responsibility for its contents. Units will only be issued upon receipt of the application form accompanying the Prospectus. Past performance of the Fund is not an indication of the Fund's future performance. Unit prices and distribution payable, if any, may go down as well as up. Where a unit split/distribution is declared, investors are advised that following the issue of additional units/distribution, the Net Asset Value ("NAV") per unit will be reduced from pre-unit split NAV/cum-distribution NAV to post-unit split NAV/ex-distribution NAV. Where a unit split is declared, investors are advised that the value of their investment in Malaysian Ringgit will remain unchanged after the issue of the additional units. Investments in the Fund are exposed to credit or default risk, counterparty risk, interest rate risk, country risk, currency risk, taxation risk, income distribution risk, asset mismatch risk, concentration risk, reinvestment risk, ratings downgrade risk and derivatives risk. Investors are advised to consider these risks and other general risks as elaborated in the Prospectus as well as fees, charges and expenses involved before investing.

All fees, charges and expenses payable by the unit holder are subject to Goods and Services Tax ("GST") at a rate of 6% or such other prescribed rate as may be imposed from time to time, and incurred by the unit holder directly when purchasing or redeeming units of the Fund and indirectly when investing in the Fund. The fees, charges and expenses disclosed are exclusive of GST or any other taxes or duties that may be imposed by the government or other authorities from time to time.

Eastspring Investments companies (excluding JV companies) are ultimately wholly-owned/indirect subsidiaries of Prudential plc of the United Kingdom. Eastspring Investments companies (including JV companies) and Prudential plc are not affiliated in any manner with Prudential Financial, Inc., a company whose principal place of business is in the United States of America.
