LIPPER LEADERS RATING (OVERALL)

Total Return	Consistent Return	Preservation	Lipper Leaders Key
④	④	③	Lowest ① Highest ⑤

The Lipper Leaders Ratings System is a set of tools that guide investors and their advisors to select funds that suit individual investment styles and goals. It uses investors-centred criteria to deliver a simple, clear description of a fund's success in meeting certain goals, such as preserving capital or building wealth through consistent strong returns.

Lipper Leader ratings are derived from highly sophisticated formulas that analyse funds against clearly defined criteria. Each fund is ranked against its peers based on the metric used (such as Total Return or Expense), and then the top 20% of funds in that ranking receive the Lipper Leader designation. Lipper Leaders measures are not predictive of future performance, but they do provide context and perspective for making knowledgeable fund investment decisions.

FUND MANAGER'S COMMENTARY

The Morgan Stanley Capital International ("MSCI") China Index rose 1.66% during the month, outperforming the broader Asia Pacific markets. During the month, the Chinese government announced its plan to gradually open up access to financial services and will remove the foreign ownership cap in the next 3 to 5 years. Chinese bond yields rose with the 10-year government bond yield hitting 4%, leading to the outperformance of insurance stocks during the month.

In Hong Kong, the Hang Seng Index rose 3.30% while the Hang Seng China Enterprise Index fell 0.28%. The Hang Seng Index ("HIS") Index was buoyed by bank stocks, which rallied after interbank rates rose.

In Taiwan, the Taiwan TAIEX index fell 2.16% as investors took profit on strong year-to-date ("YTD") gains within the technology stocks. The rotation out of technology stocks benefitted the financials and consumer stocks that have lagged far behind to date.

For the month under review, the fund returned -2.08%, outperforming the benchmark's return of -2.70% due to the underweight position in Taiwan. Overall return was negative largely due to the strengthening of the Ringgit during the month.
