LIPPER LEADERS RATING (OVERALL)

| Total Return | Consistent Return | Preservation | Lipper Leaders Key |
|--------------|-------------------|--------------|-----------------------|
| ③ | ③ | ③ | Lowest ① Highest ⑤ |

The Lipper Leaders Ratings System is a set of tools that guide investors and their advisors to select funds that suit individual investment styles and goals. It uses investors-centred criteria to deliver a simple, clear description of a fund's success in meeting certain goals, such as preserving capital or building wealth through consistent strong returns.

Lipper Leader ratings are derived from highly sophisticated formulas that analyse funds against clearly defined criteria. Each fund is ranked against its peers based on the metric used (such as Total Return or Expense), and then the top 20% of funds in that ranking receive the Lipper Leader designation. Lipper Leaders measures are not predictive of future performance, but they do provide context and perspective for making knowledgeable fund investment decisions.

FUND MANAGER'S COMMENTARY

The fund recorded a negative return of -0.7% (A Acc Share class), underperforming the Morgan Stanley Capital International ("MSCI") Emerging Markets Index (-0.3%).

Country allocation had a small negative impact, with the overweight to Russia and the underweight to India the key headwinds. These effects were partly offset by the overweights to Greece and South Korea. Greek equities rallied sharply, led higher by banking stocks. South Korea also finished ahead of the index, as North and South Korean leaders pledged to agree a formal end to the war on the peninsula.

Stock selection in Russia detracted the most from relative returns. Being overweight to Sberbank was negative as the stock fell sharply on concern over further sanctions. The off-benchmark holding in supermarket operator X5 Retail Group also detracted. The stock lost value as margin pressure in Q1 earnings results gave rise to concerns over increasing competition in the sector. In Poland, the overweight to Bank Pekao weighed on relative returns. Lower than expected inflation data for March suggested that interest rate hikes may be delayed, constraining the outlook for banking net interest margins. By contrast, stock selection in China was positive. This included the overweight to Sinopec which benefited from ongoing crude oil price strength.

IMPORTANT INFORMATION

Based on the Fund's portfolio returns as at 30 March 2018, the Volatility Factor (VF) for this Fund is 11.4 and is classified as "Very High" (Source: Lipper). "Very High" generally includes funds with VF that are higher than 10.615. The VF means that there is a possibility for the Fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six (6) months. The VF for the Fund may be higher or lower than the VC, depending on the market conditions. The Fund's portfolio may have changed since this date and there is no guarantee that the Fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC.

Investors are advised to read and understand the contents of the Eastspring Investments Master Prospectus dated 15 July 2017, the Eastspring Investments First Supplementary Master Prospectus dated 2 February 2018 (collectively, the "Prospectuses"), as well as the Fund's Product Highlights Sheet ("PHS") before investing. The Prospectuses and PHS are available at offices of Eastspring Investments Berhad or its authorised distributors and investors have the right to request for a copy of the Prospectuses and PHS.

The Prospectuses have been registered with the Securities Commission Malaysia who takes no responsibility for its contents. Units will only be issued upon receipt of the application form accompanying the Prospectuses. Past performance of the Fund is not an indication of the Fund's future performance. Unit prices and distribution payable, if any, may go down as well as up. Where a unit split/distribution is declared, investors are advised that following the issue of additional units/distribution, the Net Asset Value ("NAV") per unit will be reduced from pre-unit split NAV/cum-distribution NAV to post-unit split NAV/ex-distribution NAV.

Where a unit split is declared, investors are advised that the value of their investment in Malaysian Ringgit will remain unchanged after the issue of the additional units. Investments in the Fund are exposed to countries or foreign securities risk and currency risk. Investors are advised to consider these risks and other general risks as elaborated in the Prospectuses as well as fees, charges and expenses involved before investing.

All fees, charges and expenses payable by the unit holder are subject to Goods and Services Tax ("GST") at a rate of 6% or such other prescribed rate as may be imposed from time to time, and incurred by the unit holder directly when purchasing or redeeming units of the Fund and indirectly when investing in the Fund. The fees, charges and expenses disclosed are exclusive of GST or any other taxes or duties that may be imposed by the government or other authorities from time to time.
