LIPPER LEADERS RATING (OVERALL)

Total Return	Consistent Return	Preservation	Lipper Leaders Key
④	③	④	Lowest Highest ① ⑤

The Lipper Leaders Ratings System is a set of tools that guide investors and their advisors to select funds that suit individual investment styles and goals. It uses investors-centred criteria to deliver a simple, clear description of a fund's success in meeting certain goals, such as preserving capital or building wealth through consistent strong returns.

Lipper Leader ratings are derived from highly sophisticated formulas that analyse funds against clearly defined criteria. Each fund is ranked against its peers based on the metric used (such as Total Return or Expense), and then the top 20% of funds in that ranking receive the Lipper Leader designation. Lipper Leaders measures are not predictive of future performance, but they do provide context and perspective for making knowledgeable fund investment decisions.

FUND MANAGER'S COMMENTARY

In the May meeting, the US Federal Reserve ("Fed") held rates unchanged at 1.50%-1.75% after it raised its interest rates by 25bps in March. The Fed expects that economic conditions to evolve in a manner that will warrant further gradual increases in the federal funds rate. As such, the Fed is expected to follow through its hike rate path with at least another two rate hikes this year.

On the domestic front, the Malaysian bond market has been volatile since the recent general elections ("GE14") as the new government has unveiled the country's "real" fiscal position coupled with new economic policies such as the abolishment of Government Service Tax ("GST") and the continuity of fuel subsidies. Nevertheless, the Government has reiterated it will continue its effort to reduce debt while controlling spending.

There will be two government bond auctions in June, a new 20-year MGS benchmark security and a re-opening of 15-year MGII, and there is no MGS/GII maturity during the month. Malaysia's sovereign bond market is expected to be volatile as foreign investors continue to remain cautious on Malaysia. Separately, MYR corporate bond market is expected to see continuous decent supply in the pipeline in the coming month as issuers are eager to tap the market after being sidelined in May due to elections.
