LIPPER LEADERS RATING (OVERALL)

Total Return	Consistent Return	Preservation	Lipper Leaders Key
④	③	④	Lowest ① Highest ⑤

The Lipper Leaders Ratings System is a set of tools that guide investors and their advisors to select funds that suit individual investment styles and goals. It uses investors-centred criteria to deliver a simple, clear description of a fund's success in meeting certain goals, such as preserving capital or building wealth through consistent strong returns.

Lipper Leader ratings are derived from highly sophisticated formulas that analyse funds against clearly defined criteria. Each fund is ranked against its peers based on the metric used (such as Total Return or Expense), and then the top 20% of funds in that ranking receive the Lipper Leader designation. Lipper Leaders measures are not predictive of future performance, but they do provide context and perspective for making knowledgeable fund investment decisions.

FUND MANAGER'S COMMENTARY

May was a tumultuous month for Malaysia, starting with the 14th General Elections on the 9th May 2018, and the unexpected elections outcome. After 61 years of Barisan Nasional rule, Malaysia voted in a new government under the coalition of Pakatan Harapan (PH). The first two weeks post GE14 saw the swearing in of the new Prime Minister, Tun Mahathir, and then the subsequent swearing in of 12 cabinet ministers. May was a month of change for Malaysia, as the new government worked quickly to meet expectations as proposed in their 100-Day manifesto, starting with the announcement to set GST at 0% effective 1 June 2018 from the current 6%, and to prepare to roll out Sales and Services Tax by 1 September 2018. Malaysia's ringgit held up relatively well post GE 14, supported by the firmer crude oil prices that stayed strong as US continued their rhetoric about imposing sanctions on Iran. The FBM Shariah Emas Index closed the month at 12,175.97, down 7.54% mom. The worst performing sectors were Construction (-31.34%) and Property (-6.26%). The best performing sectors were Consumer (+6.28%) and Technology (+16.29%). Average value traded on Bursa in May was RM3,350m, an increase of 35% compared to April.
