LIPPER LEADERS RATING (OVERALL)

Total Return	Consistent Return	Preservation	Lipper Leaders Key
③	③	③	Lowest ① Highest ⑤

The Lipper Leaders Ratings System is a set of tools that guide investors and their advisors to select funds that suit individual investment styles and goals. It uses investors-centred criteria to deliver a simple, clear description of a fund's success in meeting certain goals, such as preserving capital or building wealth through consistent strong returns.

Lipper Leader ratings are derived from highly sophisticated formulas that analyse funds against clearly defined criteria. Each fund is ranked against its peers based on the metric used (such as Total Return or Expense), and then the top 20% of funds in that ranking receive the Lipper Leader designation. Lipper Leaders measures are not predictive of future performance, but they do provide context and perspective for making knowledgeable fund investment decisions.

FUND MANAGER'S COMMENTARY

The fund recorded a negative return of -3.4% (A Acc Share class), slightly outperforming the MSCI Emerging Markets Index (-3.5%).

Country allocation had a small negative impact with the overweights to Greece, Hungary and Poland weighing on relative returns. These were partly mitigated by the underweight to Mexico and the overweight to Russia.

At a stock level, selection in China and India added the most to relative returns. In China, the overweights to China Mengniu Dairy and Alibaba Group were the largest contributors. China Mengniu Dairy rallied as the company continued to gain market share under new management.

Meanwhile Alibaba bounced back following recent weakness. In India, the off-benchmark allocation to HDFC Bank was positive. The bank continued to gain market share on the back of public sector banks' travails. The share price has also been boosted by a change to foreign investor ownership restrictions.
