LIPPER LEADERS RATING (OVERALL)

Total Return	Consistent Return	Preservation	Lipper Leaders Key
②	③	⑤	Lowest ① Highest ⑤

The Lipper Leaders Ratings System is a set of tools that guide investors and their advisors to select funds that suit individual investment styles and goals. It uses investors-centred criteria to deliver a simple, clear description of a fund's success in meeting certain goals, such as preserving capital or building wealth through consistent strong returns.

Lipper Leader ratings are derived from highly sophisticated formulas that analyse funds against clearly defined criteria. Each fund is ranked against its peers based on the metric used (such as Total Return or Expense), and then the top 20% of funds in that ranking receive the Lipper Leader designation. Lipper Leaders measures are not predictive of future performance, but they do provide context and perspective for making knowledgeable fund investment decisions.

FUND MANAGER'S COMMENTARY

Equity:
June started off relatively well for Malaysian equities but corrected as investors priced in policy risk, compounded by the ongoing trade tensions between the US and China. Emerging Markets Asia performed poorly during the month as investors became more risk off faced with trade war concerns, hawkish US Fed statements, and weaker China economic data together with a weakening yuan. Malaysia experienced significant net selling of RM4.9bn, bringing 6M2018 foreign net selling to RM6.8b. The ringgit depreciated 1.3% mom, however, so has other emerging market currencies. During the month, the new Pakatan Harapan government announced the remaining cabinet line-up, a new Attorney General, and appointed a new BNM Governor. 1 June 2018 was when GST was set at zero, with the Sales and services tax prepared to roll out on 1 September. The FBM Shariah Emas Index closed the month at 12,092.55 points, down 0.69% mom. The worst performing sectors were Plantation (-3.06%). The best performing sectors were Construction (+2.60%) and Industrial Production (+0.98%). Average value traded on Bursa in June was RM2636m from RM3,350m, a decrease of 21% compared to May.

Fixed Income:
US Federal Reserve ("Fed") increased its benchmark rates by 25bps to 1.75%-2.00% in June, the second time after it first raised its interest rates by 25bps in March. The Fed remained bullish over the future of the US economy and the Fed now foresees two more rate hikes this year.

On the domestic front, the fourth Monetary Policy Committee ("MPC") meeting for 2018 will be held on 11 July. Previously, Bank Negara Malaysia ("BNM") maintained the Overnight Policy Rate ("OPR") at 3.25% during May's meeting and reiterated that the current level of OPR remains accommodative and the domestic economic outlook remains positive as "fundamentals are strongly anchored". As such, we believe BNM will keep the OPR unchanged during the upcoming meeting in July.

There will be three government bond auctions in July with no MGS/MGII maturity during the month. Malaysia's sovereign bond market is expected to remain volatile as foreign investors continue to remain cautious on Malaysia as investors are waiting for further policy clarity. MYR corporate bond market is expected to see continuous decent supply in the pipeline in the coming month as issuers are eager to tap the market after being sidelined in June due to Eid al-Fitr celebrations.
